Arthur D. Feiro

Visionary , Community Leader, Teacher, Mentor, Friend

Do you remember the first time you saw a sea cucumber up close? Or a nudibranch?

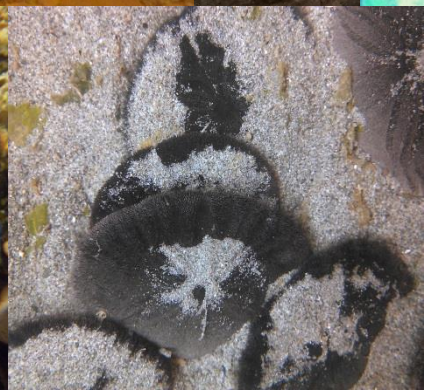

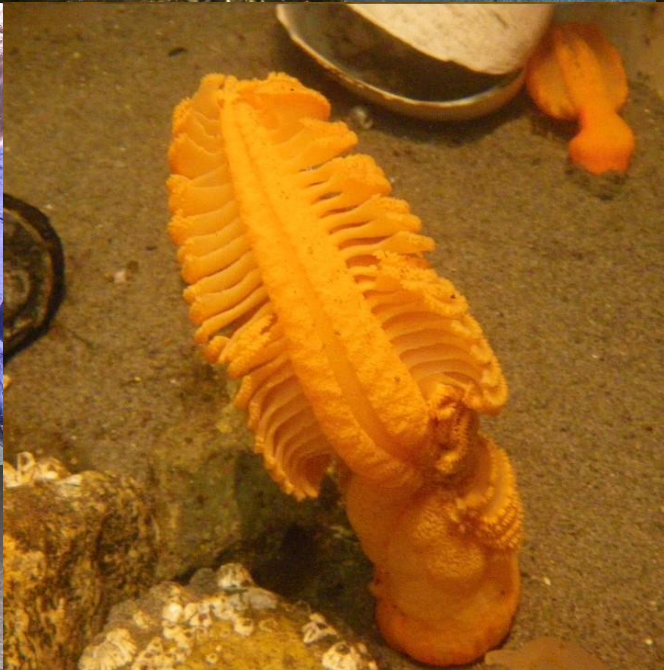

For over 30 years, the Feiro Marine Life Center has provided tens of thousands of people the opportunity to discover the marine life of the North Olympic Peninsula, increasing their appreciation and care for our marine environment.

It's a testament to what can happen when the community pulls together to realize a dream.

**We are the only Aquarium on the  
Peninsula open 7 days a week**

Speaker James L. Bodkin, Alaska Science Center,  
US Geological Survey presents:

## Sea Otter: history, biology, ecology, and recovery

Speaker Jim Cosgrove presents:

## No Mother Could Give More!

The **Life History** of the **Giant Pacific Octopus**  
Tuesday, Aug. 16, 2011 at 6:30pm  
at the Feiro Marine Life Center on the

You are invited to hear retired RBCM manager Jim Cosgrove about his underwater research into the life history of the Giant Pacific Octopus (*Enteroctopus dofleini*). Through the photographs Jim will reveal new information about the octopus. Jim's talk will cover many of the fascinating aspects of the octopus's life including colour changing, locomotion and growth rates but the emphasis will be on the octopus's life history aspects, his research for the past 15 years.

Jim and co-author Neil McDaniel have published *Suckers - The Giant Pacific Octopus*. A copy will be given in inspection.

Limited Seating is Available!

Sponsored by  
Olympic Coast National Marine Sanctuary and Feiro Marine Life Center

Speakers Dr. David Armstrong and Dr. Greg Jensen,  
both of the University of Washington, present:

## Crabs and Shrimps of the Pacific Coast

Dr. David Armstrong, principal research scientist with the  
Institute for the Study of the Atmosphere and  
Ocean (ISAO) presents:

## Climate Change: Implications for the Pacific Northwest

Friday, March 9th, 2012 at 6:30pm  
Landing Mall Conference Room

Dr. David Armstrong will summarize the past and expected  
climate changes in the global climate and specifically  
at a Pacific Northwest perspective, with a focus  
on marine ecosystems over the next 40-50 years.  
The program will include voluntary small-group  
activities to explore probable regional outcomes and  
strategies to reduce one's carbon footprint.

Promoting awareness of the endangered Southern Resident Orcas throughout their range,  
from British Columbia to California. Learn more at orcatour.org!

## 2014 JOINT COMMUNITY IMPACT

**3,200** Peninsula school children engaged in experiential science education

**32,000** Visitors were provided a unique and engaging marine science experience on the Port Angeles waterfront at Feiro and the Olympic Coast Discovery Center

### Education & Public Outreach

- Provided hands-on standards-aligned marine and watershed field education experiences to 4th and 5th grade students across Clallam County
- Co-facilitate Junior Oceanographer camps for ages 5-15
- Provide public education and interpretation on marine science, ocean life, watersheds, water quality, underwater exploration, scientific research and visitation for OCNMS and Strait of Juan de Fuca coasts.
- Co-facilitate afterschool Underwater Robotics club with middle and high school students Club runs weekly October – May.
- Joint volunteer training and recognition

### Tourism & Economic Development

- Provided aquarium and exhibit attractions on Port Angeles waterfront
- Co-hosted and supported public events designed to attract residents and visitors to the waterfront
- Partnered with and utilized services of the Port of Port Angeles and other agencies and organizations who also align with our mission and management plan (e.g., Port Angeles Boat Haven, Port Angeles Yacht Club, PA Whale Watch, Whale Trail)
- Pursued new facility for marine science and waterfront education designed to increase visitation, tax revenues and guest satisfaction
