

Stakeholder involvement, tribal consultation, government coordination and public input throughout process

## MSP Draft Actions List

**Overview:** The draft lists below are intended to describe in more detail, the actions of the Marine Spatial Plan. These items can describe the general content of the plan or actions of the planning process. They are not intended to describe specific methods for how the plan does these actions. We are looking for feedback and suggestions on the bulleted items.

When providing feedback, the following are recommended considerations:

- Compatibility with specific requirements in the Marine Spatial Planning law.
- Compatibility with SEPA scoping decisions, including the list of issues “in scope” for the plan.
- Relevance to the listed goal and objective.
- Relevance to and compatibility with existing state ocean policies.

**Overarching Goal:** To ensure a resilient and healthy marine ecosystem on Washington’s coast that supports sustainable economic, recreational, and cultural opportunities for coastal communities, visitors and future generations.

**Goal 1:** Protect and preserve existing sustainable uses to ensure economic vibrancy and resource access for coastal communities.

**Objective 1:** Protect and preserve healthy existing natural resource- based economic activity on the Washington Coast.

- Better understand and document existing marine activities taking place in the study area through scientific research and traditional knowledge research.
- Assess economic contributions of existing marine uses to the local and state economy.
- Identify and assess indicators of economic health.
- Develop a plan that protects and preserves existing uses by avoiding and minimizing significant adverse impacts from potential future activities, including impacts on aquaculture, recreation, tourism, navigation, air quality, and recreational, commercial, and tribal fishing. Identify policies and recommended actions that enable the implementation of the plan.
- Involve individuals and organizations representing existing uses in planning process such as documenting current and future trends of existing uses, understanding potential impacts and evaluating scenarios and plan recommendations.

**Goal 2:** Maintain maritime coastal communities from now into perpetuity.

**Objective 2:** Sustain diverse traditional uses and experiences to ensure continuity of WA’s coastal identity, culture, and high quality of life.

- Understand socially important uses of the marine environment, including documenting areas and uses of historical and cultural significance and current visual resources.
- Provide recommendations for activities that protect and enhance the aesthetic quality of marine environment, maritime activities, marine culture and sense of place.
- Document vulnerability of coastal communities to coastal hazards as they relate to proposed future activities.

- Identify and assess indicators of social well-being.

**Goal 3:** Ensure that our marine ecosystem is preserved for future generations.

**Objective 3:** Foster healthy and resilient marine ecosystem functions, biodiversity and habitats.

- Understand current status of the natural resources, ecosystem conditions, and the implications of various human activities including documenting species and habitats that face higher potential risk or impact from proposed activities.
- Identify and assess areas of ecological importance or particular sensitivity.
- Identify and assess ecological indicators of ecosystem health on Washington's Coast.
- Develop a plan that seeks to avoid and minimize adverse environmental impacts, with special protection provided for the marine life and resources of the Columbia river, Willapa Bay and Grays Harbor estuaries, and Olympic national park.

**Goal 4:** Develop an integrated decision making process which supports proactive, adaptive and efficient spatial planning.

**Objective 4:** Develop a locally supported and collaborative process that is coordinated with existing authorities for aligning management decisions.

- Engage local, state, federal and tribal governments in all phases of the planning process to ensure relevant management information and requirements are integrated into the process. The use or activity must comply with all applicable local, state, and federal laws and regulations.
- Coordinate with neighboring states and provinces to share technical information across all sectors, enhance management of coastal ecosystems and streamline the permitting process, where and if appropriate.
- Involve individuals and organizations representing existing uses and proposed new uses as well as individuals working on similar issues around the globe in planning process.
- Describe the management and implementation framework, including existing state laws, policies and regulations.

**Goal 5:** Encourage economic development that recognizes the aspirations of local communities and protects coastal resources.

**Objective 5:** Enhance sustainable economic opportunities to achieve a resilient economy and improved quality of life.

- Develop coastal decision-making tools, analyses & recommendations to determine appropriate and compatible roles for future activities within the study area, including siting of offshore renewable energy, new locations for dredge disposal or aquaculture, and other potential new activities such as mining, bioextraction, and cable laying.
- Identify mitigation measures to address significant adverse impacts posed by proposed future uses of Washington's coastal waters.
